CONTENTS OF VOLUME 175

No. 1. *November* 1964

PAGE

Quantal components of the synaptic potential in the ciliary ganglion of the chick. By A. R. MARTIN and G. PILAR 1

Presynaptic and post-synaptic events during post-tetanic potentiation and facilitation in the avian ciliary ganglion. By A. R. MARTIN and G. PILAR 17

Phosphatases of the goldfish intestine. By B. C. S. HOLLANDS and M. W. SMITH 31

The *in vitro* absorption of water and solutes from the intestine of goldfish, *Carassius auratus*. By M. W. SMITH 38

Recovery cycles and responses to frequency modulated tone pulses in auditory neurones of echo-locating bats. By N. SUGA 50

Quantal components of excitatory synaptic potentials in spinal motoneurones. By M. KUNO 81

Mechanism of facilitation and depression of the excitatory synaptic potential in spinal motoneurones. By M. KUNO 100

Survival of the foetal sheep at term following short periods of perfusion through the umbilical vessels. By D. PAULINE ALEXANDER, H. G. BRITTON AND D. A. NIXON 113

Length–tension relation in rabbit and human myometrium. By BRENDA M. SCHOFIELD and C. WOOD 125

The rubidium and potassium permeability of frog muscle membrane. By R. H. ADRIAN 135

No. 2. *December* 1964

Determination of the oxyhaemoglobin dissociation curves for mouse and rat blood. By L. H. GRAY and J. M. STEADMAN 161

The effect of ouabain on the electrolyte and water transport in kidney cortex and liver slices. By A. KLEINZELLER and ANNA KNOTKOVÁ . 172

The heart rate responses to carotid body chemoreceptor stimulation in the cat. By R. D. M. MACLEOD and MARY J. SCOTT 193

Effect of tubocurarine on action potentials in normal and denervated skeletal muscle. By I. M. COOKE and A. D. GRINNELL 203

Effect of calcium and magnesium on neuromuscular transmission in the hypogastric nerve–vas deferens preparation of the guinea-pig. By H. KURIYAMA 211

PAGE

The effects of alkaline earths and other divalent cations on adrenal medullary secretion. By W. W. Douglas and R. P. Rubin . . . 231

Temperature-sensitive neurones in the dog's hypothalamus. By J. D. Hardy, R. F. Hellon and Kerstin Sutherland 242

Receptors supplied by spinal nerves which respond to cardiovascular changes and adrenaline. By J. M. Leitner and E. R. Perl . . . 254

The space accessible to albumin within the striated muscle fibre of the toad. By D. K. Hill 275

The time course of the decline in sweating produced by wetting the skin. By D. F. Brebner and D. McK. Kerslake 295

Effects of tubocurarine perfused through different parts of the cerebral ventricles. By E. A. Carmichael, W. Feldberg and K. Fleischhauer 303

No. 3. *December* 1964

Activity of single efferent fibres in the cervical vagus nerve of the dog, with special reference to possible cardio-inhibitory fibres. By D. L. Jewett 321

Direct nervous pathways between the cervical vagus and the aortic or superior laryngeal nerves traversed by baroreceptor, 'pulmonary stretch', and other fibres in the cat. By D. L. Jewett 358

The oxidation and utilization of glucose and acetate by the mammary gland of the goat in relation to their over-all metabolism and to milk formation. By E. F. Annison and J. L. Linzell 372

Some properties and reflex connexions of respiratory motoneurones of the cat's thoracic spinal cord. By T. A. Sears 386

The slow potentials of thoracic respiratory motoneurones and their relation to breathing. By T. A. Sears 404

The effects of stretch on cable and spike parameters of single nerve fibres; some implications for the theory of impulse propagation. By L. Goldman 425

Contrast discrimination by neurones in the cat's visual cerebral cortex. By B. D. Burns and R. Pritchard 445

Temperature changes produced by amines injected into the cerebral ventricles during anaesthesia. By W. Feldberg and R. D. Myers . 464

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

24–25 *July* 1964

DEMONSTRATIONS

PAGE

Griffith, J. S., Horn, G. and Sassoon, G. T. A device for counting and punching counts of action potentials on to computer input paper tape . . . 1*P*

Monro, P. A. G. Measurement of blood cell velocity 2*P*

Steven, D. H. Foetal and maternal vessels of the cotyledonary placenta of the sheep 4*P*

Lewis, P. R. and Shute, C. C. D. Demonstration of cholinesterase activity with the electron microscope 5*P*

Palkama, A. and Prestige, M. C. Acid phosphatase in the developing central nervous system 7*P*

Land, M. The eye of the scallop; a concave reflector 9*P*

Page, Sally. The organization of the sarcoplasmic reticulum in frog muscle . . 10*P*

Hayter, C. J., Hutchinson, E. A., Karvonen, M. J. and Young, Maureen. Placental transport of α-amino isobutyric acid in the unanaesthetized guinea-pig . 11*P*

Palkama, A. The distribution of catecholamines and cholinesterases in the adrenal medulla 13*P*

Campbell, F. W. and Green, D. G. The use of a helium-neon laser to measure the spatial resolving power of the retina independently of the optics of the eye (T) 15*P*

Donaldson, P. E. K. Inexpensive multi-channel data recording and display (T) . 15*P*

Fitzsimons, J. T. Constriction of the inferior vena cava as a stimulus of drinking in the rat (T) 15*P*

Fleet, I. R. and Linzell, J. L. A rapid method of estimating fat in very small quantities of milk 15*P*

Biscoe, T. J. and Millar, R. A. The effect of anaesthetics on sympathetic activity 17*P*

Barker, D. V. and Gaddum, J. H. An apparatus for injections using a micrometer syringe with remote control (T) 18*P*

Bull, G. and Morris, D. Estimation of the molecular weight of choline acetyltransferase 18*P*

Hebb, Catherine O. and Morris, D. Acetylcholine synthesis in the electric organ of *Torpedo* (T) 20*P*

Hardman, D. and Pierce, A. E. Three 7*S* bovine serum immune globulins; their isolation, papain digestion, and selective transference from serum to colostrum (T) 20*P*

Cross, S. B. and Keynes, R. D. Light scattering changes in nerve and electric organ (T) 20*P*

Krnjević, K., Randić, Mirjana and Straughan, D. W. Unit responses and inhibition in the developing cortex 21*P*

Krnjević, K. and Silver, Ann. The development of cortical acetylcholinesterase (AChE) staining in the brain of the cat 22*P*

Graystone, P., McLennan, H. and Plummer, P. M. A light two-channel telemetry transmitter for brain activity 23*P*

Heap, R. B. and Perry, J. S. Progesterone in the guinea-pig; a new fluorescence method of estimation (T) 24*P*

SUBJECT INDEX

A band, albumin penetration of skeletal muscle fibre at (toad), 285
Acetate, mammary gland uptake and utilization of (goat), 372
Acetylcholinesterase, developing cerebral cortex containing (cat), 22*P*
Acid phosphatase, developing nervous system containing (*Xenopus laevis*), 7*P*
Action potentials, Ca and Mg effect on plain muscle (guinea-pig), 225
device for counting and punching counts on to computer input paper tape of, 1*P*
stretching effect on nerve (earthworm), 431
tubocurarine effect on normal and denervated skeletal muscle (frog, rat), 203
Action potential fatigue, metabolic inhibitors effect on skeletal muscle (frog), 35*P*
Adenosinetriphosphatase, intestine containing (goldfish), 33
Adrenal gland, functional capacity of transplanted (sheep), 78*P*
pregnancy with transplanted (sheep), 81*P*
Adrenal medulla, alkaline earths and other divalent cations effect on secretion by (cat), 231
catecholamines and cholinesterases distribution in (mammal), 13*P*
Adrenaline, body temperature during anaesthesia affected by injection into cerebral ventricles of (cat), 466
Pacinian corpuscle sensitivity affected by (cat), 265
vagal cardio-inhibitory fibres activity affected by (dog), 326
Afferent nerve stimulation, spinal motoneurones unit EPSP induced by (cat), 84
Albumin, skeletal muscle fibre penetration by (toad), 275
α-amino isobutyric acid, placental transport of (guinea-pig), 11*P*
Amyl nitrite, vagal cardio-inhibitory fibres activity affected by inhalation of (dog), 327
Anaesthesia, temperature changes induced by amines injected into cerebral ventricles during (cat), 464
Anaesthetics, sympathetic activity affected by (rabbit), 17*P*
Animal calorimetry, polyethylene use in separating air and wall temperatures, 31*P*
Antidromic spike potentials, thoracic spinal cord respiratory motoneurones (cat), 391
Aortic nerve, direct nervous pathways between cervical vagus and (cat), 358
Apparatus. Blood cell velocity measurement, 2*P*
Device for counting and punching counts of action potentials on to computer input paper tape, 1*P*
Telemetry transmitter, light two-way for brain activity, 23*P*
Auditory neurones, responses to frequency modulated tone pulses of (echo-locating bat), 50
Autocorrelogram, definition and use of, 450
Axoplasm, stretching nerve effect on resistivity of (earthworm), 434

Barium, adrenal medulla secretion affected by (cat), 236
Basal ganglia, inhibition of non-specific afferent system units by stimulation of (cat), 54*P*
Bat, auditory neurones response in echo-locating, 50
Blood cell velocity, measurement of, 2*P*
Blood, oxyhaemoglobin dissociation curves in different species (rat, mouse), 161
Blood pressure, afferent fibres responsive to change in (cat), 256
tubocurarine perfused through different parts of cerebral ventricles effect on (cat), 315
vagal cardio-inhibitory fibres activity affected by (dog), 325
Body temperature, anaesthetics and injection of amines into cerebral ventricles effect on (cat), 464
5-HT, noradrenaline and pyrogens injected into brain effect on (rabbit), 68*P*
Brain activity, light two-channel telemetry transmitter for (cat), 23*P*
Brain, profound systemic hypotension effect on (monkey), 50*P*
Brain stem, cholinesterase in (cat), 55*P*
Bretylium, transmission to sweat glands affected by (cat), 74*P*
Brown adipose tissue, heat production in new born affected by removal of (rabbit), 58*P*

Calcium, excitatory post-synaptic potential affected by (chick), 4
neuromuscular transmission in plain muscle affected by (guinea-pig), 211
Calorimeter, simple direct, for groups of growing pigs, 30*P*
Cardiac cycle, vagal cardio-inhibitory fibres activity relation to length of (dog), 331
Cardiovascular receptors, spinal nerves supply to (cat), 254
Carotid artery occlusion, vagal cardio-inhibitory fibres activity affected by (dog), 327
Carotid body chemoreceptors, heart rate affected by stimulation of (cat), 193
Catecholamines, distribution in adrenal medulla of (mammal), 13*P*
Caudate nucleus, cholinesterase activity shown by electron microscope in (rat), 5*P*
Central nervous system, acid phosphatase in developing (*Xenopus laevis*), 7*P*
Central respiratory drive potentials, thoracic respiratory motoneurones showing (cat), 406
Cerebral cortex, acetylcholinesterase staining in developing (cat), 22*P*
contrast discrimination by neurones in visual (cat), 445
unit responses and inhibition in developing (cat), 21*P*
Cerebral ventricles, tubocurarine actions when perfused through different parts of (cat), 303
Chemoreceptor stimulation, vagal cardio-inhibitory fibres activity affected by (dog), 336
Chloralose, body temperature affected by injection into cerebral ventricles of (cat), 473
Cholineacetyltransferase, molecular weight estimation of, 18*P*
Cholinesterases, distribution in adrenal medulla of (mammal), 13*P*
electron microscope demonstration of activity of (rat), 5*P*
Ciliary ganglion, pre- and post-synaptic events during facilitation and post-tetanic potentiation in (chick), 17
quantal components of synaptic potential in (chick), 1
Cochlear nucleus, recovery cycles of units in (echo-locating bat), 58
Cochlea, summating potentials in (pigeon), 45*P*
Conduction velocity, stretching effect on nerve (earthworm), 429
Contrast discrimination, neurones in visual cortex showing (cat), 445
Cornea, sensory irritants action on (cat), 37*P*

Dark adaptation, pressure blinding effect on (man), 39*P*
Denervation, tubocurarine effect on action potentials of skeletal muscle affected by (frog, rat), 203
potentials of skeletal muscle affected by
Dopamine, sensitive method for estimation and identification of, 27*P*
Dorsal root fibres, cardiovascular receptors innervation from (cat), 254

Echo-locating bats, auditory neurones response to frequency modulated tone pulses in, 50
Electroencephalogram, tubocurarine perfused through different parts of cerebral ventricles effect on (cat), 304
Electrolytes transport, ouabain effect on kidney cortex and liver slices (rabbit), 172
Excitatory post-synaptic potential, facilitation and depression of spinal motoneurones effect on (cat), 100
pre-synaptic potential dissociation from facilitation of (chick), 24
quantal components of (chick), 3
statistical analysis of spinal motoneurones (cat), 87
Exercise, blood acid-base changes in (man), 72*P*
increased pressure effect on respiratory response to (man), 56*P*
Extracellular space, intestinal plain muscle (guinea-pig), 38*P*
Eye, concave reflector in (scallop), 9*P*
tubocurarine perfused through different parts of cerebral ventricles effect on (cat), 313

Facilitation, ciliary ganglion cells showing (chick), 18
spinal motoneurones and site of (cat), 100
Fat, method of estimating in very small quantities of milk, 15*P*
Foetus, survival at term following short periods of umbilical vessels perfusion (sheep), 113
Forssman antibody, systemic effects of (guinea-pig), 80*P*
Frequency modulated tone pulses, auditory neurones response to (echo-locating bat), 60

Gastric secretion, intestinal mucosa extracts stimulation of pepsin without acid (cat), 60*P*

Glucose, administration route effect on disposal of loads of (man), 58*P*
mammary gland uptake and utilization of (goat), 372
ouabain effect on intestinal transport of (goldfish), 46
Goldfish, phosphatases in intestine of, 31
Gracile nucleus, innervation of cells in (rat), 46*P*
Guanethidine, transmission to sweat glands affected by (cat), 74*P*

Haemoglobin, oxygen dissociation curves in rodents of (rat, mouse), 161
Heart, pronethalol and phenoxybenzamine effect on response to adrenaline of (frog), 67*P*
two catecholamine-uptake processes in isolated (rat), 71*P*
Heart rate, carotid body chemoreceptor stimulation effect on (cat), 193
left ventricular performance affected by changes in (dog), 62*P*
Histamine, hypothalamus uptake and formation of (cat), 70*P*
Hydroxytryptamine, body temperature during anaesthesia affected by injection into cerebral ventricles of (cat), 466
Hypothalamus, histamine uptake and formation by (cat), 70*P*
temperature-sensitive neurones in (dog), 242

Inferior colliculus, recovery cycles of units in (echo-locating bat), 54
Intestinal mucosa, stimulation of pepsin without stimulation of gastric acid secretion by extracts of (pig), 60*P*
Intestine, phosphatases in (goldfish), 31
water and solutes absorption *in vitro* from (goldfish), 38

Junction potential, Ca and Mg effect on plain muscle (guinea-pig), 217

Kidney cortex, ouabain effect on water and electrolyte transport in slices of (rabbit), 172

Lactation, mammary gland metabolism of glucose and acetate in relation to (goat), 372
Lithium, ouabain effect on electrolytes and water transport in renal cortex slices loaded with (rabbit), 175
Liver, ouabain effect on electrolytes and water transport in slices of (rabbit), 186
Lung inflation, vagal cardio-inhibitory fibres activity affected by (dog), 334
Lungs, pulmonary hypertension in response to brief inflation of (cat), 64*P*

Magnesium, adrenal medulla secretion affected by (cat), 235
excitatory post-synaptic potential affected by (chick), 4
neuromuscular transmission in plain muscle affected by (guinea-pig), 211
Mammary gland, glucose and acetate uptake and utilization by (goat), 372
Membrane capacitance, stretching effect on nerve (earthworm), 435
Membrane potential, Ca and Mg effect on neuromuscular junction in plain muscle (guinea-pig), 212
rhythmic fluctuations in thoracic respiratory motoneurones (cat), 406
rubidium effect on membrane current in skeletal muscle relation to (frog), 148
stretching effect on nerve (earthworm), 430
thoracic spinal cord respiratory motoneurones (cat), 390
Mid-brain, responsiveness to sensory stimulation of cells in (rabbit), 40*P*
Milk formation, mammary gland metabolism of glucose and acetate in relation to (goat), 380
Miniature potentials, ciliary ganglion and (chick), 7
Monosynaptic excitation, of respiratory motoneurones by afferent fibres in intercostal nerve (cat), 393
Monosynaptic EPSPs, size of units (cat), 84
Muscle spindle, small motor nerve stimulation effect on (frog), 48*P*
Myoclonus, tubocurarine perfused through different parts of cerebral ventricles causing (cat), 311
Myometrium, tension–length relation in (man, rabbit), 125

Nerve fibre, conduction velocity relation to diameter in afferent (cat), 33*P*
stretch effect on cable and spike parameters of (earthworm), 425
Neuroglia, dielectric breakdown as second mechanism of electrical response of, 52*P*
Neuromuscular transmission, Ca and Mg effect in hypogastric nerve–vas deferens preparation on (guinea-pig), 211
Nilevar, progestational steroid, action of (guinea-pig), 77*P*
Nodose ganglion, direct connexion between aortic and cervical vagus nerves in (cat), 363

Non-medullated nerve, positive and negative heat production with single impulse in (rabbit), 42*P*
Noradrenaline, body temperature, during anaesthesia affected by injection into cerebral ventricles of (cat), 466

Ouabain, electrolytes and water transport in kidney cortex and liver slices affected by (rabbit), 172
intestinal absorption of water and solutes affected by (goldfish), 40

Pacinian corpuscle, adrenaline effect on sensitivity of (cat), 265
Pentobarbitone, body temperature affected by injection into cerebral ventricles of (cat), 473
Pericardium, action potentials in afferent fibres from receptors in (dog), 63*P*
Phosphatases, intestine containing (goldfish), 31
Pig, simple direct calorimeter for prolonged observations on groups of growing, 30*P*
Placenta, α-amino isobutyric acid transport by (guinea-pig), 11*P*
foetal and maternal vessels of cotyledonary (sheep), 4*P*
Plain muscle, Ca and Mg effect on neuromuscular transmission in (guinea-pig), 211
electrical responses to intracellular electrical stimulation of (guinea-pig), 36*P*
extracellular space of intestinal (guinea-pig), 38*P*
Poisson's law, spinal motoneurones response to afferent nerve stimulation and (cat), 88
Post-ganglionic sympathetic terminations, Hydergine action on, 66*P*
Post-tetanic potentiation, site in ciliary ganglion of (chick), 17
unit EPSP affected by (cat), 105
Potassium, ouabain effect on intestinal transport of (goldfish), 45
skeletal muscle permeability to rubidium and (frog), 134
Pregnancy, tension–length relation in myometrium affected by (man, rabbit), 128
transplanted adrenal gland effect on (sheep), 81*P*
Propionate, pH effect on intestinal transfer of (rat), 61*P*
Pulmonary arterial pressure, brief lung inflation effect on (cat), 64*P*
Pulse, vagal cardio-inhibitory fibres activity variation with (dog), 329
Pulse pressure, receptors innervated by spinal nerves response to (cat), 256

Purkinje fibres, membrane capacitance of, 47*P*

Respiration, thoracic respiratory motoneurones membrane potential affected by phases of (cat), 406
tubocurarine perfused through different parts of cerebral ventricles effect on (cat), 312
vagal cardio-inhibitory fibres activity affected by (dog), 324
Respiratory motoneurones, properties and connexions of thoracic spinal cord (cat), 386
slow potentials and their relation to breathing (cat), 404
Rodents, oxyhaemoglobin dissociation curves of (rat, mouse), 161
Rubidium, skeletal muscle permeability to potassium and (frog), 134
Rumen epithelium, studies with isolated (sheep), 28*P*

Scallop, concave reflector in eye of, 9*P*
Sex, female attributes of males castrated at birth (rat), 75*P*
Skeletal muscle, albumin space inside fibres of (toad), 275
metabolic inhibitors effect on action potential fatigue in (frog), 35*P*
pumped movements of K and Rb in (frog), 49*P*
rubidium and potassium permeability of (frog), 134
sarcoplasmic reticulum organization in (frog), 10*P*
tubocurarine effect on action potentials of normal and denervated (frog, rat), 203
Sodium, ouabain effect on intestinal transport of (goldfish), 44
ouabain effect on steady-state efflux from renal cortex slices of (rabbit), 178
Spinal motoneurones, facilitation and depression of EPSPs at (cat), 100
quantal components of excitatory synaptic potentials (cat), 81
Spinal nerves, cardiovascular receptors supplied by (cat), 254
Strontium, adrenal medulla secretion affected by (cat), 232
Superior laryngeal nerve, direct nervous pathways between cervical vagus and (cat), 358
Sweat glands, guanethidine and bretylium action on transmission to (cat), 74*P*
Sweating, control in cattle of, 69*P*
time course of decline produced by wetting the skin (man), 295

Sympathetic system, anaesthetics effect on activity of (rabbit), 17*P*
Synaptic vesicles, morphology and acetylcholine content of isolated, 25*P*

Temperature regulation, 'warm' and 'cold neurones' in hypothalamus concerned in (dog), 242
Thoracic respiratory motoneurones, properties and connexions of (cat), 386
slow potentials and their relation to breathing (cat), 404
Thyrotrophic hormone, inhibitory properties of chemically modified, 76*P*
Tubocurarine, action potentials in normal and denervated skeletal muscle affected by (frog, rat), 203
actions when perfused through different parts of cerebral ventricles (cat), 303

Umbilical vessels perfusion, survival of foetus following (sheep), 113
Uterus, tension–length relation in myometrium in different segments of (man), 128

Vagus nerve, activity of single efferent fibres in cervical (dog), 321
direct nervous pathways between aortic and superior laryngeal nerves and cervical (cat), 358
Vagus nerve stimulation, central respiratory drive potentials of thoracic respiratory motoneurones affected by (cat), 412
Ventilation volume, cardio-inhibitory fibres activity affected by (dog), 334
Ventral nerve roots, ACh outflow from (cat), 33*P*
Visual cortex, contrast discrimination by neurones in (cat), 445
Visual pigments, circular dichroism of (various), 43*P*

Water transport, ouabain effect in kidney cortex and liver slices on (rabbit), 172

Z line, albumin penetration of skeletal muscle fibre at (toad), 285
